THE PHASELOCK CODE

*Through Time, Death, and Reality:
The Metaphysical Adventures of the Man
Who Fell Off Everest*
by Roger Hart

PARAVIEW POCKET BOOKS
ISBN: 0-743477-25-1
Memoir, 368 pages
Trade paperback, \$14.00

For Professor Roger Hart, life truly began after he almost lost his—in a horrific fall off the slopes of Mount Everest that he miraculously survived. This near-death experience sparked a desire in him to devote his studies to the very nature of human consciousness, in order to unlock the code of reality that binds our world.

On an adventure of discovery that would take him around the world, Hart would experience life-altering transcendental events in Tibet, Morocco, and Tierra del Fuego—opening the door to a true understanding of the nature of man.

In this groundbreaking volume, he explores the participation of consciousness in the creation of reality, challenging the traditional scientific view of time, space, and objectivity and describing in detail his own metaphysical journey, which has involved synchronicity, precognition, and telekinesis. It is an exploration of the very things that make us human—and a quest that touches upon the meaning of life itself.

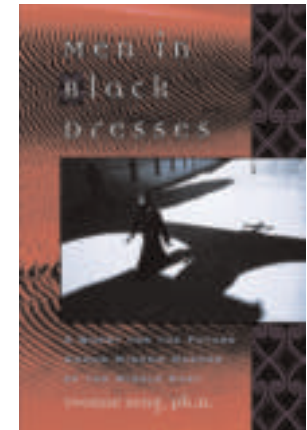

“Those with a thing for physics and an openness to Eastern philosophy will appreciate the vigor and the clarity of Hart’s ideas about how we simulate reality, create time, and shape the world with our thoughts.”—Kirkus

“A thought-provoking read...”—Library Journal

ROGER HART is a former research professor at the College of Ocean and Atmospheric Sciences at Oregon State University, and was a member of the first American expedition to Mount Everest. He has worked as an exploration geophysicist in the rain forests of Ecuador and Brazil, had a glacier named after him in Antarctica, lived and traveled in more than forty countries, and appeared on numerous radio talk shows and television programs. He has written articles for such periodicals as *National Geographic*, *Audubon*, *Sunset Magazine*, and *Oregon Coast Magazine*. Hart currently lives on the Oregon coast.

MEN IN BLACK DRESSES

*A Quest For The Future Among Wisdom-Makers
of the Middle East*
by Yvonne Seng, Ph.D.

PARAVIEW POCKET BOOKS
ISBN: 0-743477-26-X
Spirituality/Memoir, 304 pages
Trade paperback, \$14.00

If we pause long enough, we can hear, above the din of our planet’s rapid globalization and technological advancement, the quiet voices of spiritual leaders from ancient faiths. Middle East historian Yvonne Seng asks, what can these modern Desert Fathers with their long history of survival advise us on the future of our planet? Her intellectual quest rapidly becomes a personal journey that turns her Western training and perceptions on their head.

Men In Black Dresses takes the reader behind the walls of desert monasteries, Sufi enclaves, ancient cathedrals, and mosques—where the author knocks, uninvited, and waits for the wise men to allow her in. Once inside, they discuss the universal concerns of the environment and the Internet, the building of a global community and the education of coming generations, as well as the state of the human spirit. The author’s gutsy personal style reveals the extraordinary humanity and humor of spiritual leaders rarely seen by the West.

“...a quite extraordinary book. It took me on a journey to places utterly unknown and unimagined to most westerners. It opened my mind and my heart in unexpected ways, making me smile and bringing me to tears. Yvonne Seng has a unique, addictive style of writing. I found it impossible to put this book down.”—Jane Goodall

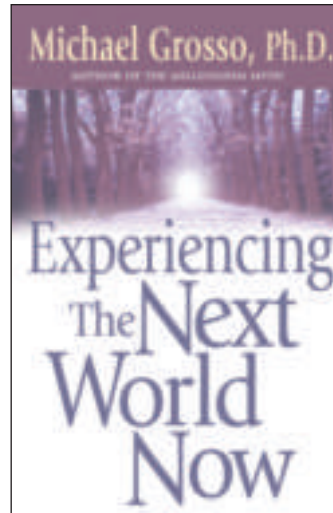

*“A born raconteur, Yvonne Seng takes the reader by the hand through a medley of fascinating firsthand encounters—some startling, some downright funny. This is a field trip into the surviving pockets of a world one had thought was long gone.”—Huston Smith, *The Way Things Are* and *The World’s Religions**

YVONNE SENG is a cultural historian specializing in the Middle East and Turkey. Based in Washington, D.C., she has taught at American University’s Center for Global Peace, Georgetown and Princeton universities, and Wesley Theological Seminary. In 2000, she was a speaker at the State of the World Forum’s special session on faith and technology.

EXPERIENCING THE NEXT WORLD NOW

by Michael Grosso

From the scientific underground of psychic research comes a stunning report on the evidence for life after death. But all the proof in the world is nothing when compared to actual experience with the place beyond. This book takes the reader to the next level—and offers a more personal kind of journey. If there is a “next world,” it must be nearby—and the path leads through the gateways of our own minds. Philosopher Michael Grosso shows us how to open these passages—or at least peek through a keyhole—and glimpse what may lie beyond. This is the guidebook for an adventure that nobody can refuse.

THE BEASTS THAT HIDE FROM MAN

Seeking the World's Last Undiscovered Animals

by Karl P.N. Shuker, Ph.D.

Cryptozoology—the study of hidden animals—is gaining attention thanks to a startling number of zoological discoveries. Karl P.N. Shuker has collected evidence of these mysterious, somewhat mythical creatures in *The Beasts that Hide from Man*. Shuker provides entertaining, solidly researched tales about extraordinary animals such as:

- The *dobhar-chú*, Ireland's murderous master otter
- Mongolia's death worm, which reportedly electrocutes its victims
- The blood-drinking "death bird" of Ethiopia
- The *tzuchinoko*, a bizarre Japanese snake with a bounty on its horned head
- Sea serpents from around the world
- Hairy reptiles, furry fish, living unicorns, and more.

Shuker also provides a supplement to Bernard Heuvelmans's checklist of cryptozoological animals, which contains updated information on unknown creatures.

KARL P.N. SHUKER, Ph.D., is a zoologist and an expert in cryptozoology, animal mythology, and wildlife anomalies. The author of ten books on mysterious phenomena, his writing has also appeared in *Fate*, *Strange Magazine*, and *Fortean Times*. He also acted as a consultant for *The Guinness Book of World Records* and the Discovery TV series *Into the Unknown*. He is a scientific fellow of the Zoological Society of London, a fellow of the Royal Entomological Society, and a member of the International Society of Cryptozoology and the Society of Authors. He lives in the West Midlands, England.

THE PRANKSTER AND THE CONSPIRACY

The Story of Kerry Thornley and How He Met Oswald and Inspired the Counterculture

by Adam Gorightly
Foreword by Robert Anton Wilson

One of the 1960s counterculture's most fascinating characters was Kerry Wendell Thornley—a writer, philosopher, Zen dishwasher, enlightened prankster, and, possibly, an Oswald double with disturbing ties to the Kennedy assassination. A lifelong provocateur, Thornley was linked to many of the fringe elements of the time. He helped create the spoof religion called the Discordian Society and its tract, the *Principia Discordia*. He coined the term “paganism” to describe various nature religions. And he befriended Robert Anton Wilson, inspired the *Illuminatus*, and gave his anarchic support to the Bavarian Illuminati, a brilliant prank. But Thornley's path also crossed Lee Harvey Oswald's. It's a fact that the two served together in the Marines. But did they keep in touch later, in New Orleans? And were they both used by foes of JFK? Jim Garrison investigated their relationship—and so does Adam Gorightly in *The Prankster and the Conspiracy*, an account of Thornley's tragic yet hilarious life, the JFK conspiracy, and the chaos caused by worshipping the goddess of discord.

“Adam Gorightly is a ‘crackpot historian’ of the very hippest sort.”
—Paranoia magazine

ADAM GORIGHTLY is the author of *The Shadow Over Santa Susana: Black Magic, Mind Control, and “The Manson Family” Mythos*. His articles have appeared in zines such as *The Excluded Middle*, *Crash Collusion*, *UFO Magazine*, *Paranoia*, *SteamShovel Press*, *Pills-a-go-go*, *Dagobert's Revenge*, and *Saucer Smear*.

GONZO SCIENCE

Anomalies, Heresies, and Conspiracies
by Jim Richardson and Allen Richardson

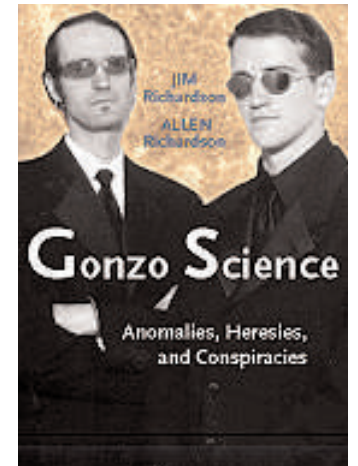

True believers and skeptics beware: what you know about science may be wrong. Science commentators Jim and Allen Richardson are more faithful than the believers and more skeptical than the skeptics—and they're funnier, too. They expose the fault lines in modern science, remove the linchpins of established theories, resolve anomalies, and present alternatives to mainstream assumptions.

In *Gonzo Science*, the Richardson brothers investigate:

- Theories that threaten the Big Bang
- Evidence of an exploded planet in our solar system
- What really causes UFOs
- Why life on Earth may have evolved from outer space
- The misuse of science that creates nuclear waste and genetically modified food
- How the community of professional skeptics has gone wrong
- Cutting-edge research in astronomy, plasma physics, biology, archaeology, cold fusion, consciousness, and history

Also included are the Gonzo brothers' interviews with alternative-science luminaries such as astronomer Tom Van Flandern, systems theorist Fritjof Capra, biologist Rupert Sheldrake, cold fusion physicist Edmund Storms, JFK assassination researcher Jim Fetzer, and others.

JIM and ALLEN RICHARDSON's *Gonzo Science* articles have appeared in *The Ripsaw News* of Duluth, Minnesota, and *The Anomalist*. Their website at www.gonzoscience.com features more essays from the Richardsons as well as the tuneful *Gonzo Science* CD.

FAMILIES AND THE INTERPRETATION OF DREAMS

Awakening the Intimate Web

by Edward Bruce Bynum, Ph.D., ABPP

PARAVIEW SPECIAL EDITIONS

ISBN: 1-931044-65-1

Psychology, 260 pages

Trade paperback, \$19.95

Dreams reveal and illuminate not only our personal unconscious, but also our shared experiences—especially our family life. In this original and breakthrough book, Edward Bruce Bynum explores the often hidden messages of our dreams as they relate to that intimate web connecting our parents and children, spouses and lovers, friends and the wider culture. Drawing on material from the ongoing Family Dreams Research Project, Bynum explains how to identify dreams in which family themes play a role; their impact on one's emotions, decisions, and physical health; and also the cultural images embedded within all these.

Families and the Interpretation of Dreams is written for those individuals interested in seeing how their own lives are reflected in their own dreams, and how their own lives are intimately reflected in the dream-life of others.

“Examines the very neglected but extremely important topic of dreams which occur among family members. . . . A theoretical paradigm for better understanding interactions among members of our global family.”

— Robert L. Van de Castle, Ph.D., former president
of the Association for the Study of Dreams

EDWARD BRUCE BYNUM is the Director of Behavioral Medicine at the University of Massachusetts, Amherst. He is the author of several books, including *The Family Unconscious*, *The African Unconscious*, and *Transcending Psychoneurotic Disturbances*.

THE GREAT NEW ENGLAND SEA SERPENT

An Account of Unknown Creatures Sighted by Many Respectable Persons Between 1638 and the Present Day
by J.P. O’Neill

Is it a strange mammal related to the seals, a descendant of a prehistoric reptile, or a new, unidentified animal? Whatever it is, or was, the witnesses call it a sea serpent. Remarkably similar descriptions of a creature with a long body, undulating motion, and horse-sized, snake-like head have left a trail of clues and controversy going back three centuries.

In *The Great New England Sea Serpent* J.P. O’Neill draws on the historical record as well as previously unpublished first-hand accounts to chronicle more than 230 sightings of the mysterious marine creatures inhabiting the Gulf of Maine. This book is for all the people who look at the sea, and wonder...

“The Great New England Sea Serpent... is a landmark in sea-serpent books. It gets high marks for being truly cryptozoologically aware, full of passion, and a great story that continues to unfold.”

—Loren Coleman, author of *Bigfoot!* and *Mysterious America*

“An extremely impressive work of scholarship, which will unquestionably remain the standard work on this significant example, and episode, in the history of unidentified marine creatures.”

—Karl Shuker, author of *The New Zoo* and *The Beasts that Hide from Man*

“This is a marvelous book. No one with an interest in marine life, cryptozoology, or the magic and mystery of the oceans should pass it by.”

—Matthew Bille, author of *Rumors of Existence*

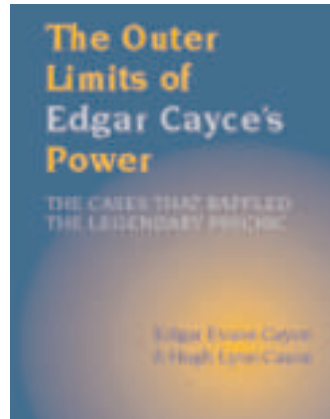

JUNE PUSBACH O’NEILL spent her formative years in the past playground of the sea serpent, Swampscott, Massachusetts, and has never stopped hoping to catch a glimpse of “His Snakeship.”

Edgar Cayce, America's "sleeping prophet," was one of the most active and trusted psychics of the 20th century. Thousands of people relied on him for insights into their physical and emotional health, spiritual questions, business prospects, and dreams. His writings still inform us today.

Cayce's readings were stunningly accurate—about 85 percent of them hit the mark. But some cases seemed to be beyond his abilities.

Why did his powers fail him at times—if they in fact did?

In *The Outer Limits of Edgar Cayce's Power*, his sons, Edgar Evans Cayce and Hugh Lynn Cayce, investigate the questions that challenged the prophet's seemingly unlimited psychic abilities — cases involving buried treasure, readings for the dead, and missing persons. They delve into why their father didn't succeed at times and explore what this teaches us about the nature of psychic perception. They also address allegations that Cayce's psychic abilities were a hoax and offer an intimate portrait of the renowned psychic as a father.
