HUNT FOR THE SKINWALKER

**SCIENCE CONFRONTS THE UNEXPLAINED
AT A REMOTE RANCH IN UTAH**

BY COLM A. KELLEHER, PH.D., and GEORGE KNAPP

Praise for HUNT FOR THE SKINWALKER:

" **HUNT FOR THE SKINWALKER** is a well told and true account of the amazing strangeness discovered by a scientific team doing investigations for the National Institute of Discovery Science. Reading this account was like hearing, word for word, for the second time the reports of the field investigators."

—Edgar Mitchell, Sc.D. Astronaut, NIDS SAC

For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of huge, otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flying orbs of light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become a life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them—perhaps science could.

HUNT FOR THE SKINWALKER (Paraview Pocket Books; December 6, 2005; \$14.00) by Colm A. Kelleher, Ph.D., and George Knapp, is the true story of how a team of research scientists set about studying a stream of anomalous encounters on this remote Utah ranch. With backgrounds in

mainstream physics, biochemistry, and veterinary studies, the team ventured into the darkest corners of the mysterious Skinwalker Ranch in an objective search for data—and explanations.

Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Colm Kelleher spent hundreds of days and nights on the Skinwalker property and experienced firsthand many of its haunting mysteries. With investigative reporter George Knapp—the only journalist allowed to witness and document the team’s work—Kelleher chronicles in superb detail the spectacular happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, **HUNT FOR THE SKINWALKER** is a clarion call to expand our vision far beyond what we know.

ABOUT THE AUTHORS:

Colm A. Kelleher, Ph.D., is the author of the national bestseller *Brain Trust*, a groundbreaking expose of the hidden connection between mad cow disease and Alzheimer’s disease. He is currently a senior research scientist in the biotechnology sector. Following his doctorate degree in biochemistry from University of Dublin at Trinity College in 1983, Kelleher worked at the Ontario Cancer Institute, the Terry Fox Cancer Research Laboratory, and the National Jewish Center for Immunology. For nearly a decade, he worked as project manager and team leader at a private research institute in Las Vegas, using forensic science methodology to unravel scientific anomalies.

George Knapp is an eight-time Emmy Award-winning journalist whose reporting on Nevada’s infamous Area 51 military base was selected by UPI as Best Individual Achievement by a Reporter (1989). Other awards include the Associated Press’s Mark Twain Award for newswriting and the Edward R. Murrow Award for Investigative Reporting. An anchor and reporter for the CBS affiliate KLAS-TV in Las Vegas, he also writes an award-winning weekly column for a Las Vegas newspaper.
